WORK EXPERIENCE

AI-Assisted Product Building

Oct 2025 - Present

Using Agentic AI tools such as Claude, OpenAI Codex, and Cursor to build websites and applications with faster iteration, stronger execution, and improved development workflows.

Flutter Developer – Ongoing Team

Nov 2024 - Oct 2025

Worked on Flutter application interfaces, API integrations, navigation flows, and company product requirements. Contributed to scalable mobile application development and collaborative agile workflows.

Internship – Ongoing Team

Nov 2024 - Jan 2025

Completed an internship at Ongoing Team, working on development tasks, product workflows, and team-based execution during the first phase of professional company experience.

PROJECTS

Presynx

[presynx.com](#)

Presynx is a multi-tenant queue management solution for clinics, hospitals, and healthcare branches. Contributed to Flutter-based kiosk and staff/admin platforms handling patient check-in, token generation, queue display, doctor and service routing, consultation workflows, reporting, and organization-level administration with responsive and scalable UI architecture.

Yujix

[app.yujix.com](#)

Yujix is a productivity and business management platform focused on delivering a seamless user experience across web and mobile applications. Built Flutter interfaces for meetings, contacts, surveys, events, quotations, invoices, subscriptions, notifications, authentication flows, and account management with adaptive responsive layouts.

Trust Up

[trustup.app](#)

Trust Up is a community-driven platform designed to help users discover needs, offers, skills, goods, and local opportunities within one connected ecosystem. Worked on Flutter application modules focused on community hubs, resource discovery, communication flows, and accessible interfaces that support collaboration and real-world connections.

Ongoing Forge

[ongoingforge.com](#)

Ongoing Forge is a SaaS project-management and collaboration platform built for structured organizational workflows and operational management. Contributed to product workflows involving Laravel backend services, MySQL-based data management, and Vue.js-powered interfaces supporting project execution, collaboration, communication, and organization management.

EDUCATION

2022 – 2025	Bachelor’s Degree in Computer Applications, Silver Oak University	(CGPA: 8.67/10)
2022	Class 12th	(84.05%)
2020	Class 10th	(86.45%)

TECHNICAL SKILLS

Mobile Development	Flutter, Dart, Firebase
Tools & Technologies	REST APIs, Dio, BLoC, Git, GitHub
Architecture	Clean Architecture, Responsive UI, State Management
AI & Coding Agents	OpenAI Codex, Claude, Cursor
